

# DeLux

- Developed joint understanding & approach between mobile operators and a car manufacturer
- Defined the relevant use cases both from MNO- and car-manufacturer perspective
- First tests including test drives delivered important initial results

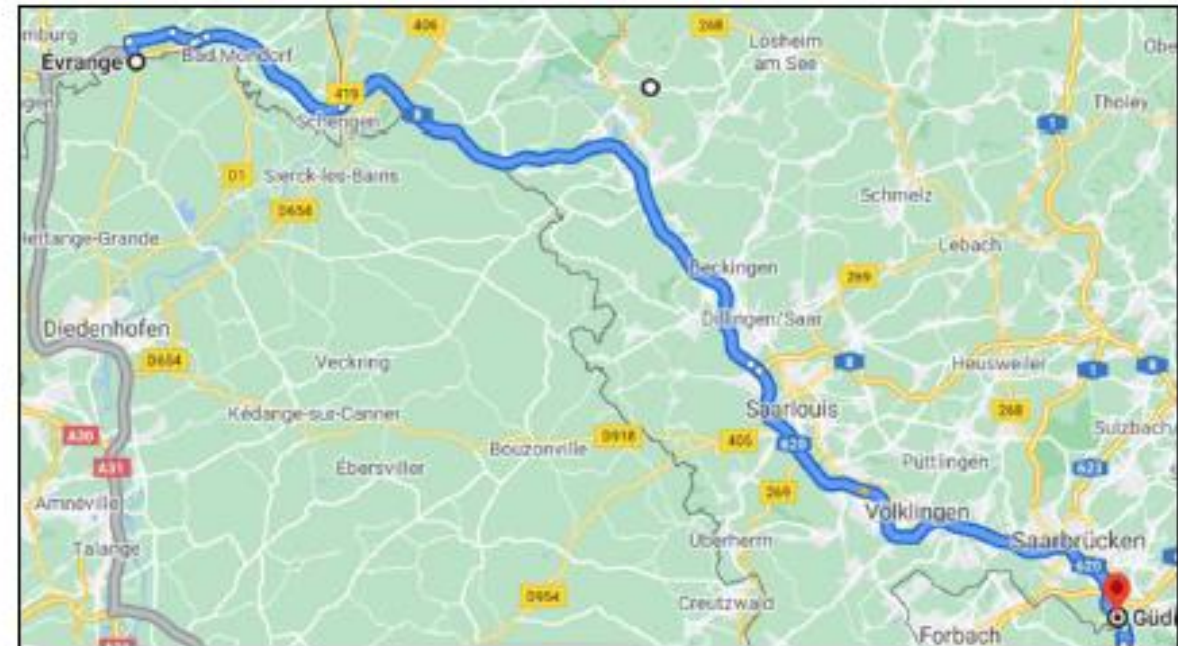

Telekom  
Deutschland

Post Luxembourg  
(MNO in LUX)

OEM with  
specific  
requirements for  
X-border mobility

# Challenges and recommendations

## Challenges

- Permanent roaming
- Legal interception
- Steering overruled

## Recommendations

- Approach Seamless Handover as a key driver for Customer Satisfaction
- Develop once & roll out!  
Develop Handover Solution for 4G & 5G and to roll it out at all borders
- Connected Cars is considered a flagship use case along European transport paths. Include the car manufacturers
